

Reasons to Choose a Best Freelancing Platform

Sarah was on her family way, 9 months pregnant.

It was Monday morning when she found out she got fired from her company. With her two other kids to feed, she had no idea how to do it. So she did exactly what anyone who needed side income would have done back in 2012.

Waiting for days to miracle happen, no one responded. She tried many freelancing platforms, but no one responded to her services. She made her account on [FreelanceItOut](#) for her writing services.

Saturday afternoon, she joined the platform officially. After months, now FIO has replaced her 9-5 job. She is known as the "Writing Queen." Her family has food on the table. She is not the only success story on [FreelanceItOut](#).

Job security is a scam and myth that lulls you into a false sense of security, so you do what you are told. But people are becoming aware of the facts. It's scary to have one source of income. You are a slave. Your entire mental well-being and financial future depend on one person. This is true for both employees and entrepreneurs.

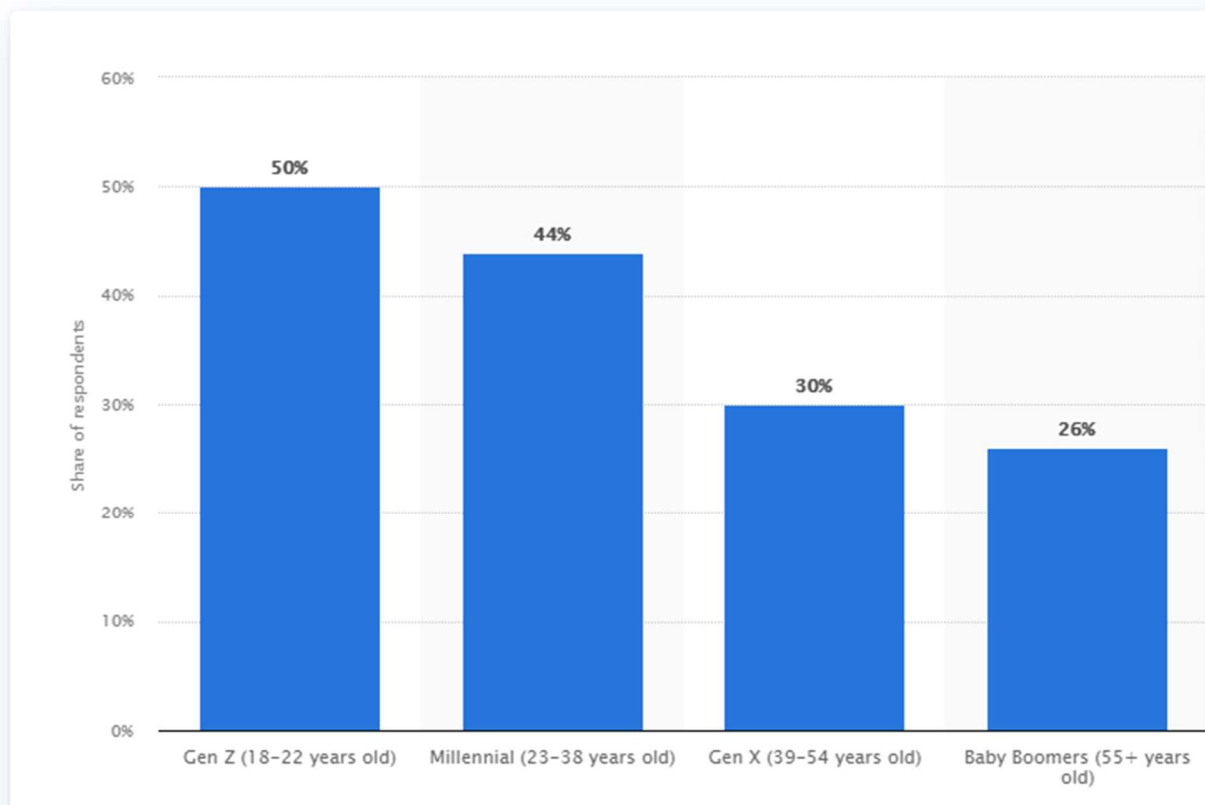

For those who don't want to be servants and slaves anymore, [FIO](#) exists.

FIO is a freelance marketplace for professional and creative services. I know you want to know more about this platform and how people can use it for a full-time job replacement or additional sources of income.

It helps figure out how to empower big business corporates and small business owners to enlist talented freelancers to complete tasks at a specified time frame and budget. Here are the top reasons why everyone should use [FIO](#).

Millennial: [44%](#) of freelance users in the United States are millennials.

You're not a millennial: 30% of users are not millennials.

As all the cool adults are freelancing in United States and around the globe, so come and join FIO.

Remote Services: Many freelance platforms help their sellers productize their services remotely. Being your boss is a bit challenging; when you also have to build your platform from scratch, it is not a cup of cake.

FIO sets its sellers up for success by providing the solution to these 3 challenges.

1. First, you can find short-term, long-term, and high-paying clients through the FIO platform and marketplace. You post your services, clients choose your offerings and pay you for that service.

2. Second, FIO takes away your time-consuming and painful negotiation process. You display your price and rates; people choose according to the size of their wallets.
3. Finally, FIO collects all the money owed to you on the site. Suppose one day you are having dinner with your friends and your client calls you 10 times to ask if he could pay \$400 instead of your \$650 rate. Even after 15 polite "No's," the client ended up paying you \$300. Now what? You don't have to run around the countries to have your hard-earned dollars. You can sit on your couch in your pajamas and let FIO do it for you.
